

Ipython extension that may be of ...

[clune](#) 113 posts since

May 31, 2007 A company, Tech-X, is in the process of developing a parallel extension of Ipython that might be useful for any of (1) improved performance of legacy code (2) parallel visualization/analysis or (3) interactive computing in a distributed environment. The product is in a very early stage (Phase I SBIR), but summary slides are attached. Interested users should contact Tech-X ASAP to have an influence on future development
